ANICATH L/A™

ANICATH L/A™

Polyurethane cannula suitable for long-term use for up to 20 days.

With incorporated features and materials to help reduce the incidence of cracking catheters, thrombosis and phlebitis associated with some inferior catheter materials used for extended periods.

Sterile packed in a recyclable Millpack™ pouch. 

FEATURES & BENEFITS

- Winged for suturing and or taping in place.
- Non-coring, tri-faceted needle bevel with greater wall thickness. 15% stronger than other brands - Reduced risk of bending on insertion.
- PUR with precision conical catheter material - Anti-kink, espouses to natural vein contours and inner wall surface profile, softens with body temperature for added comfort and flexibility.
- Siliconised - Superior glide during insertion and placement.
- Hydrophobic blood sealing plug in needle flashback chamber - Allows early visualisation of venipuncture.
- Trocar locks on to the cannula - Prevents unnecessary rotation of the trocar when advancing the cannula.
- Two advancement notches on the hub that aids sturdy advancement.
