Kalayjian Veterinary Infusion Pipettes

Manufactured from the highest-grade polystyrene. Designed with a special rounded end for easy insertion and a flexible adapter that fits snugly to any size syringe. Pipettes are 55cm in length. Come in packs of 25.

Code	Product	Price	Qty
KI-2200	Sterile Infusion Pipettes (Pack of 25)	\$5.45	
KI-2250	Non-Sterile Infusion Pipettes (Pack of 25)	\$45.20	

Kalayjian Veterinary Swabs

The specially made plastic swab is highly resistant to accidental breakage. However, it can be broken into transport media for holding when cultures are taken outside of the clinic. The Guarded Culture Instruments are individually packaged and certified USP Sterile.

Code	Product	Price	Qty
KI-3000	Guarded Culture Instruments Cotton	\$23.90	
KI-3350	Guarded Culture Instruments Poly	\$12.00	
KI-650	6 Inch Poly Swab	\$4.20	

Millpledge Anicath.

An exciting range of short to extended-term use indwelling catheters from Millpledge, designed specifically for the larger animal where greater volumes of fluid are required and venous access requires further reach.

Using the same familiar material components of the hub, suture wings and flash bulb you have enjoyed in the Anicath, we have now incorporated the following additional features and materials to help reduce the incidence of cracking catheters, thrombosis and phlebitis associated with other inferior catheter materials used for extended periods.

- Winged – For suturing and or taping in place.
- Non-coring, tri-faceted needle bevel with greater wall thickness 15% stronger than other brands – Reduced risk of bending on insertion.
- PUR with precision conical catheter material – Anti-kink, espouses to natural vein contours and inner wall surface profile, softens with body temperature for added comfort and flexibility.
- Siliconised – Superior glide during insertion and placement.
- Hydrophobic blood sealing plug in needle flashback chamber – Allows early visualisation of venipuncture.
- Trocar locks on to the catheter – Prevents unnecessary rotation of the trocar when advancing the catheter.
- Two advancement notches on the hub – Aids sturdy advancement.
- Short-term or long-term use up to 20 days

Calving

Manual calving rope as used by vets and farmers for many years. Available in blue, red and green to aid identification – all with a single or double loop option. About 1.8 metres long and manufactured in the UK from soft 8mm diameter 3 strand nylon rope. These strong ropes measure about 1.8m and are able to withstand the rigours of many detergent washes.
