

VET1 Maxi Lift Table

Maxi-lift treatment and transport table

The Vet1 Maxi-lift treatment and transport table has **electric height adjustment** and a **tabletop of 130 x 60 cm**. The corners of the table are **equipped with bumpers** for safe transport of the table. The height adjustment range of the table is **30 – 100 cm**.

The table has a steel structure coated with powder paint resistant to chipping and scratching. The envelope-shaped tabletop is made of stainless steel, in which there is one drain hole. Features quality German lifting system with paddle height control.

Underneath the table is a stainless-steel handle system for easy adjustment of the table height. A **battery** located in the base of the table makes it easy to adjust the table height without the need to plug the table into an electrical outlet.

Features of the table:

- Tabletop size (130x60 cm)
- Linear actuator with permissible load of 150 kg
- Steel base, covered with powder coated paint resistant to chipping and scratching
- 4 casters with locking mechanism
- Stainless steel "envelope" shaped top with 1 drain hole and 1 bowl
- 6 tie-down hooks (3 on each side)
- Included mattress covered with durable upholstery

**Maximum lift with
minimum effort**

**Lifts Super High 100cm and Super Low 30cm
to reach 1st and 2nd tier cage banks**
