

Stainless Steel Cages

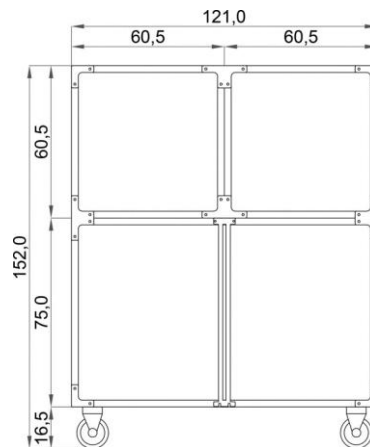

Vet1's AISI 304 stainless steel cage banks have been designed by and for veterinarians, so it is prepared to comfortably accommodate animals in need of medical care and assist veterinarians in this important task.

These Hospitalization Cages are extremely robust and easily cleaned with the frontal threshold preventing fluids from draining to the cages below. An optional sewer drain is also available which greatly improves the cleanability. They come with high security latches, big wheels to easily move the cage bank and brakes to prevent motion once in place.

There are several accessories available, such as fluid and infusion pump holders, oxygenation door, and PVC coated floor grid to prevent animals from being in contact with debris.

Options & Accessories

Optional Sewage Drain

All Cages can be supplied with Optional Sewage Drains. The Sewage Drain System needs to be installed at the factory; therefore, it cannot be added later. It must be ordered as a factory inclusion.

Optional Oxygen Therapy Doors

The oxygenation door allows to seal the inside of cages and kennels, metering inner humidity and temperature, being able to regulate the humidity content.

Small stainless-steel frame and polycarbonate panel have little visual impact and makes the inside of the cage entirely visible. Possibility to connect an oxygen concentrator for oxygen therapy. Only available for 61 x 61 Door

Stainless Steel Cages

Infusion Pump Support

Simple vertical fit which hooks onto the Vet1 cage. Adjustable for Drip Line & Pump Support

Also available is our Universal Cage Mount suited to all brands of Cages

Medicine Container

Stainless Steel Medicine Container hooks onto the front of the cage 20x10x5cm

Stainless Steel Clipboard

Easily clips onto the Cage Door keeping the patient records tidy & all together.
